FOR LEAH STUKOV | FTLR FITNESS

Your Growth Roadmap

Thirteen small steps, taken one at a time, to turn your approved app into active, loyal members. You choose each step and you approve every result.

Prepared for	Company	Prepared by	Date
Leah Stukov	For the Long Run Fitness LLC	Up Agency	October 15, 2026

Congratulations on getting FTLR Fitness this far. An approved app is the starting line. This roadmap shows what can come next, in the order that makes the most sense, with the result you can expect from each step. It is a menu, not a commitment. Take what helps and leave the rest.

1 How we work together

One step at a time
Each step is small, clear and has one visible result.

You stay in control
Nothing starts without your written yes. Pause or stop any time.

You approve every result
You see the work before we talk about the next step.

Your payment is protected
Everything runs through Fiverr, so both of us are safe.

2 The roadmap at a glance

LAUNCH READY	LAUNCH WEEK	BUILD THE HABIT	GROW
Oct to early Nov	**Nov**	**Nov to Dec**	**Dec to Jan**
Be found and be ready on day one	Get the first ratings and a smooth first purchase	Turn new members into regular members	Reach more people and keep them

3 Phase 1 and 2: be ready, then launch

STEP	WHAT YOU GET	WHAT IT CHANGES	A GOOD TIME
App Store listing pack	Your App Store name, subtitle, keywords and promotional text, written and checked so they are ready to paste.	Strangers find FTLR and understand it in seconds.	Now. Promotional text can change anytime. Name, subtitle and keywords go live with your next app update.
Five designed screenshots	Five captioned screenshots using your real screens and telling one story.	Screenshots decide who installs.	After the listing. Applied with your next app update.
Launch announcement pack	Your launch email, community post and pinned chat message, written in your voice.	Launch day is ready before launch day.	Before November 1.
Welcome and 7 day messages	Day 0, 1, 3, 7 and 14 messages written and set up.	A first workout within 24 hours keeps members.	Launch week.
Ratings prompt	A polite request for a rating after a finished workout, never at a bad time.	Ratings build trust and ranking.	After your first 20 members. Ships in your next app update.
Purchase flow polish	Clearer progress and a faster unlock after someone subscribes.	Waiting after paying feels risky. Today it can take about 12 seconds.	After the first real purchases. Ships in your next app update.

4 Phase 3: build the habit

STEP	WHAT YOU GET	WHAT IT CHANGES	A GOOD TIME
Design quick pack	Three improvements to your sign in and home screen, in your brand.	A calm, consistent first impression.	After the launch week review.
Onboarding flow	A goal choice, a welcome note from you and a first workout button.	Turns installs into active members.	After the design quick pack.
Analytics dashboard	One simple view: members, active members, subscriptions and cancellations.	You fix the biggest leak first.	About 30 days after launch.
Workout reminders	Gentle reminders that bring members back to train.	Habits need a nudge.	After onboarding is live.

5 Phase 4: grow and keep your members

STEP	WHAT YOU GET	WHAT IT CHANGES	A GOOD TIME
Android on Google Play (three small steps)	Your Google Play account and setup, then the Android app with the same subscriptions, then your listing and submission.	Opens the other half of the market. Same app, same plans.	When members show demand. We measure first, using the 14 day count in your playbook.
Retention messages (two small steps)	Welcome and win back messages designed for the right moments, then built, tested and running on their own.	Quiet members come back without you chasing them.	After the analytics dashboard shows where members drop off.
Invite a friend	A personal invite link with a reward for both people.	The cheapest growth there is.	After retention is live. Rewards follow Apple's rules.

Your launch is protected. Anything that changes the iPhone app is bundled into planned updates, so Apple reviews fewer versions and nothing puts your Nov 1 launch at risk. Web side improvements can go live sooner.

6 What each step looks like

1. You pick a step	Tell me which one matters most right now.
2. You get a clear written scope	What you receive, what I need from you, and what is not included.
3. You say yes	Work starts only after your written approval.
4. You review the result	You approve it, or ask for the agreed revisions.
5. Next step, only if you want it	No pressure. We can pause for as long as you like.

What matters most to you in the next 30 days? We start there.

Thank you for trusting me with FTLR Fitness. I am glad to be part of it.
