WEBSITE GROWTH AUDIT

DRHC Dubai

drhc.ae | Dubai Healthcare City | Prepared for Dr. Rami and the DRHC team

DRHC is led by a consultant spine surgeon, with phone and WhatsApp contact and several specialties. The booking path is unclear and a few visible details weaken the page.

What I found on your website

What I saw	What it costs you	The fix
The Make an appointment today section says Fill the form below, but no form fields appear. Booking otherwise depends on a button that redirects to an external link.	A patient who reaches the form and finds nothing, or is sent off the site, often gives up.	**A working, short booking form on the page with a confirmation message.**
The three hero banners (spine, gastroenterology, radiology) are image only links with no visible call to action.	The most prominent space on the page does not tell visitors what to do next.	**Clear banners with a Book now button for each specialty.**
Typos and inconsistency: customer representitve, Daycase Hospital and Day Case Hospital, Majan Clinic and Majan Wadi al safa, and page addresses with comprehencive and orhtopedic.	Typos on a medical site weaken trust, and inconsistent clinic names confuse patients about where to go.	**A proofread build with consistent names and clean page addresses.**
Only one testimonial is shown, with no rating, review count or before and after content. The WhatsApp icon appears to load from a staging domain.	Patients considering surgery want proof from patients like them, and a staging asset can break at any time.	**A review wall pulled from your Google reviews and assets hosted on your own domain.**

What your new website will do for DRHC Dubai

- A booking first homepage with a short form, WhatsApp and a clear call to action on every specialty banner.
- Proof beside every booking button: named consultants, real reviews and patient stories.
- Specialty pages written to rank for searches like spine surgeon Dubai and orthopedic surgeon Dubai.

How it works

1. **15 minute call**
   I show you a preview of your new design. No cost.
2. **Approve the look**
   You pick changes. I build in days, not months.
3. **Launch and track**
   Booking, WhatsApp and forms tested on mobile before go live.
