WEBSITE GROWTH AUDIT

Image Dent

image-dent.com | Riyadh | Prepared for the Image Dent team

Your Arabic site has doctors, 623 reviews and a booking form, but the English version, messaging options and several details lose patients.

What I found on your website

What I saw	What it costs you	The fix
The English version appears to be only a stub, with a Book Appointment heading and a divider.	Expats and visitors who read English cannot use the site.	**A full English version of every key page.**
No WhatsApp anywhere. Four phone numbers are listed, and the phone links contain spaces (tel:+966 11 4836060).	Saudi patients message first, and links that fail lose calls.	**A WhatsApp button and tested click to call links.**
Several reviews show only a name with no text, one doctor uses a default placeholder photo, and the specialities menu does nothing when clicked.	Empty reviews and placeholders look unfinished.	**Real reviews, doctor photos and working menus.**
The home page has repeated buttons (book twice in a row), no address or map, no before and after, and some spelling errors.	Patients do not know where you are or what results to expect.	**Address and map, results gallery and clean copy.**

What your new website will do for Image Dent

- Arabic and English versions with a WhatsApp and booking button.
- Real reviews, doctor photos, address map and a results gallery.

How it works

1. **15 minute call**
   I show you a preview of your new design. No cost.
2. **Approve the look**
   You pick changes. I build in days, not months.
3. **Launch and track**
   Booking, WhatsApp and forms tested on mobile before go live.
