WEBSITE GROWTH AUDIT

Norton Implants

nortonimplants.com | Harley Street, London | Prepared for Dr. Michael Norton and team

Norton Implants has over 35 years of experience, about 10,000 implants placed and a WhatsApp number. The homepage hides that proof behind grey placeholders and sends every booking link to one page.

What I found on your website

What I saw	What it costs you	The fix
The Testimonials, Publications and Lecture dates tiles use empty grey placeholders, and no reviews or cases appear on the page.	A patient choosing an implant surgeon looks for proof. Grey boxes where the proof should be tell them there is none.	**Real testimonials, publications and captioned before and after cases in place of the placeholders.**
There is no booking or enquiry form on the page. Every booking link goes to the same page, and there is no live chat.	Every extra click costs consultations, and a patient who wants to ask a quick question has nowhere to do it on the page.	**A short booking form on the page, with WhatsApp beside it.**
Lecture Diaries in the menu links to #, Read More links to an anchor that may not exist, and the Book your consultation link has a stray space in its address.	Broken links lose visitors and a booking link that may fail loses consultations directly.	**Tested links, with every booking button going to a working form.**
The phone number and address repeat in the header, body and footer, the menu appears twice, and social icons have no labels.	Repeated blocks dilute a clear message and weaken credibility.	**One clean layout with consistent descriptions of each doctor.**

What your new website will do for Norton Implants

- A proof first homepage that uses your 35 years and 10,000 implants, with real testimonials and cases beside every booking button.
- A booking form on the page and WhatsApp for quick questions.

How it works

1. **15 minute call**
   I show you a preview of your new design. No cost.
2. **Approve the look**
   You pick changes. I build in days, not months.
3. **Launch and track**
   Booking, WhatsApp and forms tested on mobile before go live.
