WEBSITE GROWTH AUDIT

Horizon Dental Clinics

horizondent.com | Al-Nahda, Riyadh | Prepared for the Horizon Dental team

Horizon has 13 doctors, bilingual pages, WhatsApp and Google reviews. A few visible errors and conflicting numbers make a new patient hesitate right before booking.

What I found on your website

What I saw	What it costs you	The fix
A stray No results line appears at the top of the page above the header, and one review card shows a raw screenshot file name.	Visible leftovers make a clinic look unfinished at the first glance, before the patient reads anything.	**A clean page with no leftover or system text.**
The hero says +870 trusted customers while the counter says +23000. A reviewer names Dr. Selena, who is not on the staff list, and Dr. Omar appears under two spellings.	Conflicting numbers make patients doubt every claim on the page.	**One verified set of numbers and a staff list that matches your reviews.**
Seven doctors share the same generic image and several others share a Female Dentist placeholder.	Patients choose who treats them. Without real photos, 13 doctors look like none.	**Real doctor profiles with photos, specialty and credentials.**
There is no booking form on the homepage. Visitors must leave to book, and no before and after results or review count appear.	Every extra click costs bookings, and unproven claims such as best price and world class do not persuade.	**A booking form in the hero, a review count and captioned before and after cases.**

What your new website will do for Horizon Dental Clinics

- A proof first homepage with real doctor photos, a review count and captioned smile cases beside every booking button.
- A booking form in the hero plus WhatsApp, so a patient books in under 30 seconds.
- Treatment pages in Arabic and English written to rank for searches like dental implants Riyadh.

How it works

1. **15 minute call**
   I show you a preview of your new design. No cost.
2. **Approve the look**
   You pick changes. I build in days, not months.
3. **Launch and track**
   Booking, WhatsApp and forms tested on mobile before go live.
