WEBSITE GROWTH AUDIT

Citadel Real Estate

citadel.com.qa | Doha, Qatar | Prepared for the Citadel team

Citadel has 13 years in the Qatar market, bilingual pages and active listings. The site looks dated and does not capture the leads it attracts, and a visible server error damages trust at the first glance.

What I found on your website

What I saw	What it costs you	The fix
A PHP warning is visible at the top of the page, exposing a server file path and a Permission denied error from an image plugin.	A visible server error tells a buyer or landlord that the site, and maybe the business, is not looked after.	**A clean rebuild with no exposed errors, tested on every device.**
There is no enquiry form, only a property search and a newsletter box. The page says WhatsApp us but shows no number or link.	A buyer ready to ask about a listing has no way to do it and moves on to the next agency.	**An enquiry form and a working WhatsApp button on every listing.**
Almost every listing says Price on request, Find Your Home and the main menu links go to #, and the footer still reads Citadel 2019.	Hidden prices and dead links remove the reasons to click, and a 2019 footer signals an agency that has stopped updating.	**Clear prices where possible, working navigation and a current, trustworthy look.**
The linkedin icon points to Snapchat, two different phone numbers are shown, and the same listings appear twice. Typos such as suite to the property appear in the copy.	Mismatched contact details and typos make buyers unsure which number is real and who to trust with a large purchase.	**One verified contact set, correct social links and proofread copy.**

What your new website will do for Citadel Real Estate

- A lead first homepage: property search, enquiry form and WhatsApp on every listing.
- Proof near every enquiry button: named agents, licence details and client reviews.
- Area pages written to rank for searches like apartments for rent in Doha and villas for sale in Qatar.

How it works

1. **15 minute call**
   I show you a preview of your new design. No cost.
2. **Approve the look**
   You pick changes. I build in days, not months.
3. **Launch and track**
   Booking, WhatsApp and forms tested on mobile before go live.
